Our FCM-P-21 Crescent Pull has a soft flat surface with a gentle radius that turns into a perfectly rolled front detail that is a full 1/4" thick. Our standard finishes are based on the most popular requests but any custom finish can be achieved on this quality material. With a smooth wide surface, this pull is a real beauty. We polish and plate or powder coat in any finish you require.

Please call us for any special request you may have. We are here and always eager to help!
